

November 10, 2025 at 7:29am: On Continuing Intrusion from Donald Trump Into Our Home

I am still attempting to do work this morning and I am still experiencing a synchronization of vehicles driving past the front of our house to coincide with specific and important points in my legal work.

I am documenting the ongoing use of illegal surveillance to intrude into my legal work and legal writings.

I am unable to practice law under these conditions and am only able to perform limited work for my immediate family as they understand that this is occurring and are forced to endure this along with me.

Our life has become completely stifled by Donald Trump's criminal conspiracy.

I cannot in good conscience subject any paying clients to an illegal surveillance state that is watching over every single letter of typing that I write and every single document of work that I read.

It simply is against my client's best interests to allow them to be subjected to the ongoing illegal surveillance that is being forced upon our home. The criminal government that is being run by Donald Trump is using every bit of information that they illegally acquire to cause harm to people of all types. I refuse to contribute information from my paying clients to their illegal spying operations.

Donald Trump and his illegal operation have used threats, illegal surveillance, and ongoing harassment to 'get their way' in a myriad of ongoing disputes that they continue to 'pick' with people all around them.

Apparently, their criminal conspiracy has no fear of any legal repercussions for their actions and they show no intention of stopping at anytime.

I am continuing to document that the rule of law has completely fallen under the leadership of Donald Trump's criminal conspiracy.

We are no longer operating within the confines of a government that is abiding by any rule of law or moral virtue.

We are being ruled over by a criminal dictatorship.
